Our Brands

Challenge Areas

Food

What tools and technologies can help farmers grow more with less?

Water

How can cities, communities, and businesses improve the quality and efficiency of their water systems?

Data

How does the world connect to the technologies that power modern life?

Health

What can material science do to make medicine safer and easier to administer?

Infrastructure

How do we build better, safer, smarter, more efficient cities and communities?

Circularity

What measures can help products and production models minimize environmental harm and maximize circularity?

Select Stories

Food

NetBeat is the first-ever digital irrigation solution to offer automated, intelligent delivery of water, fertigation, and crop protection.

Water

Rainwater catchment systems in Central America provided 80 million liters of water for home use last year.

Data

We manufacture more than 400 million meters of conduit per year for delivery of fiber-optic internet and other datacom needs.

Health

HFA 152a is a new medical propellant for asthma inhalers that lowers carbon emissions by 90% and increases affordability.

Infrastructure

The PlasticRoad is a modular pavement replacement made from 70% post-consumer recycled plastic. Two successful pilot bike paths were installed in 2018.

Circularity

Sentio and Calefa are smart systems for temperature control in homes or larger buildings that enable significant energy savings.

Our Business Groups & Brands

Building & Infrastructure

From large scale civic and commercial construction to in-home solutions, this business group focuses largely on water management while also providing a number of other products and services. We help build better cities and more capable communities.

Precision Agriculture

Through efficient drip irrigation systems, digital farming tools, and innovative services we aim to empower Netafim's mission of helping farmers "grow more with less." We help feed the planet without wasting water.

Data Communication

Duraline creates the conduit tubing required to physically connect homes, buildings, and entire communities to high-speed internet. We help the benefits of data access reach as far and wide as possible.

Fluor

Fluorite from our two mines in Mexico is transformed into a range of fluoroproducts that make up so many fundamental parts of human life today. From health to food to basic comfort, this is how we support a wide variety of human advancement.

Polymer Solutions

Salt and ethane are transformed into valuable compounds including PVC, PE, ethylene, chlorine, caustic soda, and sodium hypochlorite used to manufacture a vast array of products. This is how we help improve safety, aid infrastructure, and modernize medicine.
