About this Report

This is Orbia's 12th annual Sustainability Report, covering the role we play in society and our impacts on people, communities and the environment. Data in this report relates to the 2020 calendar year. Our last report was published in 2020 covering 2019 performance. The scope of information in this report is all global businesses under Orbia's operational control. All monetary figures in this report are expressed in USD unless otherwise specified.

Environmental and safety data in this report covers sites that were active and operational during 2020, from their date of acquisition or up to their date of divestment, for all sites where we have operational control and excluding joint ventures where we have 50% or less ownership. Environmental data includes manufacturing sites (excluding offices, warehouses, distribution centers or other sites). Safety data includes all facilities including manufacturing sites, offices, warehouses, distribution centers, and R&D labs.

This report has been prepared in accordance with the Global Reporting Initiative (GRI) Standards: Core option. The selection of content for this report was informed by a set of material topics developed through a process described in our Materiality Assessment Results. This report also includes disclosures (see the Appendix) as follows: Sustainability Accounting Standards Board (SASB) 2018 Chemicals Standard; Orbia's annual Communication on Progress for the UN Global Compact; and Orbia's CEO Water Mandate disclosure. A stand-alone document aligned with the recommendations of the Taskforce on Climate-related Financial Disclosures (TCFD) is issued simultaneously with the Sustainability Report.

During 2020, as we refined our greenhouse gas emissions inventory, following recommendations from the World Resources Institute (WRI) we expanded the scope to include certain process emissions related to Scope 1 that had not been previously included, as well as purchased heat, steam and cooling water Scope 2 related emissions. We have also updated our waste reporting in line with GRI's new Waste Standard, GRI 306 (2020).

Our Sustainability Report was assured by an independent third party; the Assurance Statement can be found in the Appendix. Throughout this report, data marked with a check mark (✔) is third-party assured.

We welcome your feedback, queries and suggestions. Please contact:

Cristina Gil White
Vice President of Sustainability, Orbia
