Our Strategic Transformation as Orbia

2

Our Strategy for Value Creation

3

Our Business Groups

Our Strategic Transformation as Orbia

A Force for the World

orb · bia

The Latin word for a spherical globe

A word from Greek mythology for the personification of force

Our Purpose

Advance life around the world.

Challenges We Address

Food & Water Security

Decarbonization & Energy Transition

Information Access & Connectivity

Our Values

Be Brave

Take Responsibility

Embrace Diversity

Driven by purpose and unified by values, we choose to tackle the world's toughest challenges.

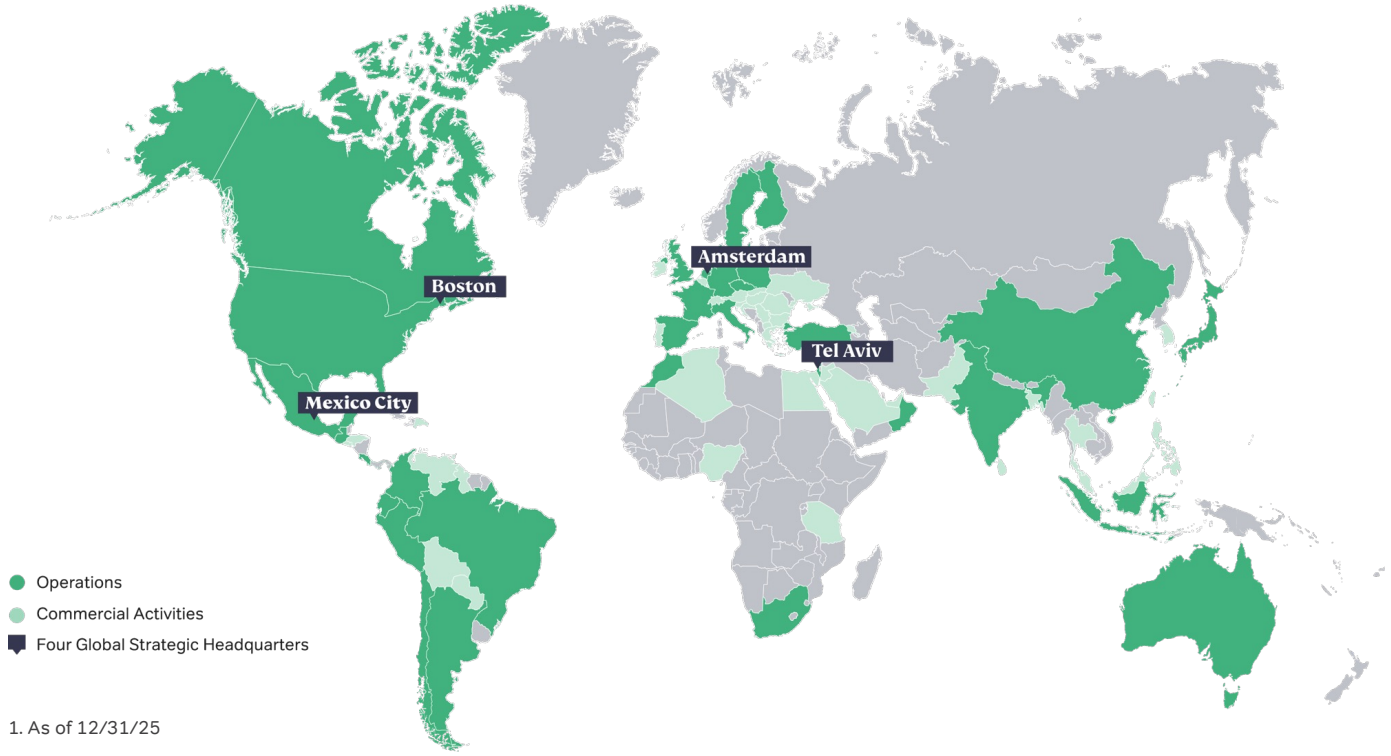

With more than 70 years of history and a bold vision for the future, we deliver sustainable materials, technologies and solutions that help our customers secure food and water supplies, expand connectivity, decarbonize industries and accelerate the global energy transition.

Our customers rely on Orbia for market-shaping partnerships that improve competitiveness, reduce risk and build resilience.

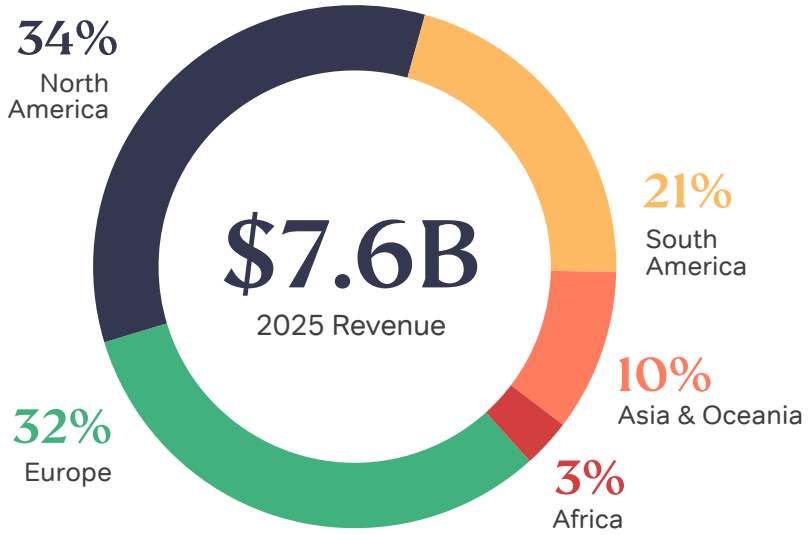

Global Imprint and Impact

Our Successful Evolution

Integrating 33 acquisitions since 2003 has boosted sales and EBITDA and made Orbia a leader within the industries it operates.

Source: Company filings. 1. 2018 considers Netafim's integration since February 7th, 2018. 2. Figures for 2017 do not consider EBITDA from Netafim. 3. Net debt in 2018 and 2017 includes US$0.3 million and US$0.9mm, respectively; in 2016 includes $1.4mm and in 2015 US$21.4mm, corresponding to letters of credit and suppliers' credits exceeding 180 days, which, only for the purposes of the covenants of the Cebures and our revolving credit facility, are considered financial debt, although they are not recorded as debt in our balance sheet 4. Acquired in 2018.

Addressing Global Challenges

We have identified three key challenges our businesses can contribute to:

Decarbonization & Energy Transition

Orbia provides resilient urban infrastructure solutions along with circular building products that contribute to decarbonization. Orbia is also an industry leader in developing advanced battery materials that will secure the North American supply chain.

Information Access & Connectivity

Orbia delivers infrastructure that creates the physical pathways for fiber and other network technologies that connect cities, homes and people worldwide.

Food & Water Security

Orbia delivers resource-efficient irrigation solutions to support food security and provides PVC for use in pipes and fittings as well as solutions for smart, city-scale water management.

Addressing Global Challenges

The five Orbia business groups have a collective focus on solving our three global challenge areas of food and water security, connectivity and information access and climate resilience and decarbonization.

Decarbonization & Energy Transition

Orbia Fluor & Energy Materials

Develops advanced battery materials to secure the North American supply chain and creates low global warming potential refrigerants and medical propellants to support the sustainability transition of the automotive and pharmaceutical industries.

Information Access & Connectivity

Orbia Connectivity Solutions

Delivers infrastructure that creates the physical pathways for fiber and other network technologies that connect cities, homes and people worldwide.

Food & Water Security

Orbia Polymer Solutions

Develops polyvinyl chloride (PVC) general resins, specialty resins, compounds, derivatives and additives for vinyl compounds that are used to create pipes that deliver safe drinking water and sterile healthcare equipment.

Orbia Water & Climate Solutions

Works to ensure safe and efficient water supply, sanitation and hygiene, climate-resilient cities and better building performance through solutions such as indoor climate control technology and smart city-scale water management systems from stormwater management to blue-green roofs to tree tanks.

Orbia Precision Agriculture

Enables a food-secure future through the development of precision agriculture solutions that maximize crop yield and quality while minimizing environmental and resource impact to help farmers grow more with less.

Advancing Life Around the World

Our solutions advance our three global challenges through multiple industries essential for everyday life.

- Food and Water Security
- Decarbonization and Energy Transition
- Information Access and Connectivity
- ♻ Circularity Program

Energy Transition

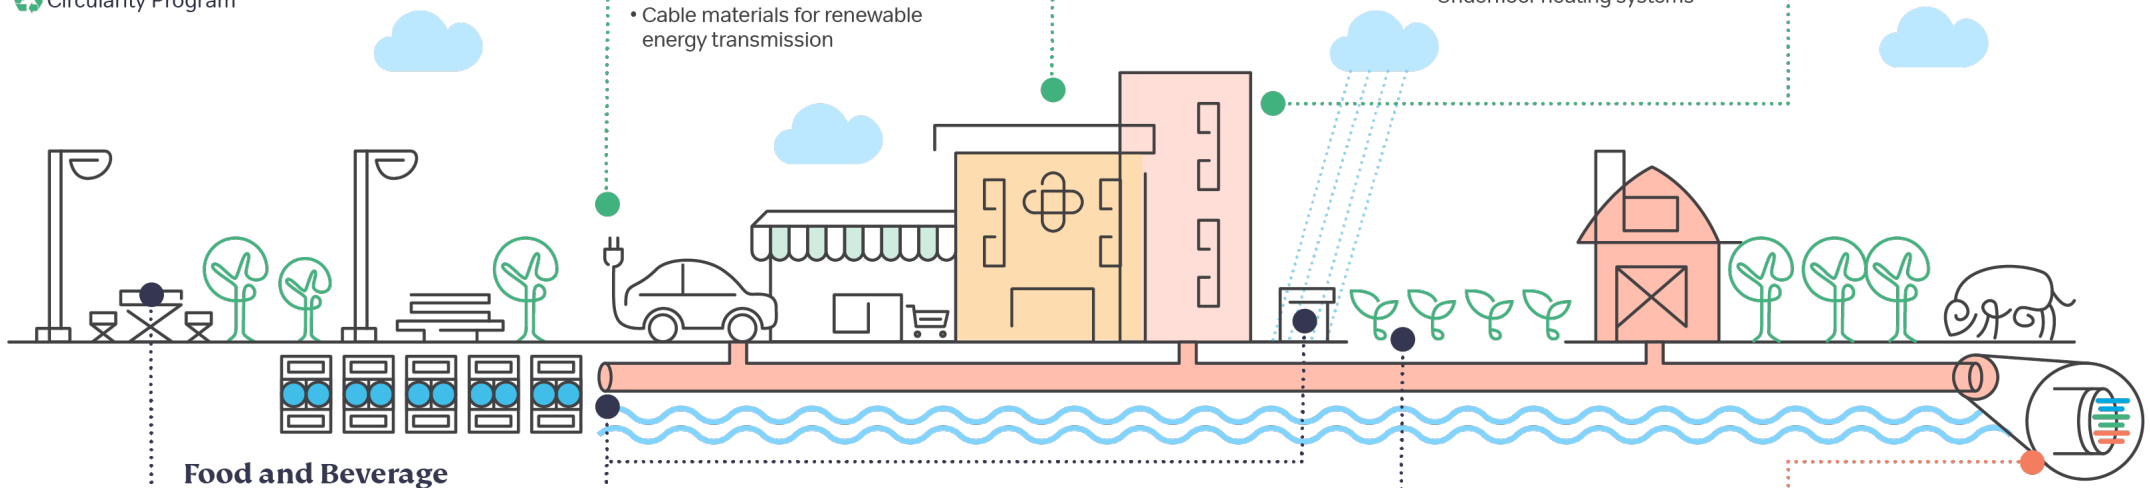

- Electrolytes for lithium-ion batteries
- Electrolyte salts and additives
- PVDF/e ectrode
- Recycled battery materials ♻
- Cable materials for renewable energy transmission

Infrastructure and Construction

- Refrigerant gases ♻
- Geostructures ♻
- Gas distribution pipes
- Electricity distribution pipes
- Smart temperature control systems
- PVC resins and compounds ♻ (windows, flooring, decks, roofs, cables, pipes)
- Underfloor heating systems

Healthcare

- Medical propellants for inhalers
- Recycling post-use ♻ blood infusion bags and therapy tubing

Food and Beverage

- pH stabilizers
- Caustic soda
- Sodium hypochlorite
- Food preservation
- Oxygen scavengers

Water and Sanitation

- Water distribution pipes
- Solid waste pipes
- Infiltration, attenuation and TreeTanks ♻
- Waste water drainage
- Rainwater harvesting systems
- Storm water management systems
- Smart blue-green roofs ♻

Agriculture

- Precision irrigation systems ♻
- Digital farming solutions
- Controlled environment agriculture (CEA)

Data Communication

- Cable installation products
- Data cable conduits ♻
- Data cable jackets

Our Contribution to the UN Sustainable Development Goals

Orbia is a signatory of the UN Global Compact, which encourages businesses worldwide to adopt sustainable and socially responsible practices.

We are committed to becoming a global accelerator of the Sustainable Development Goals (SDGs) set forth by the United Nations (UN) General Assembly.

Sustainability is an integral part of Orbia's commitment to advance life around the world. We design and co-create solutions that solve interconnected problems at scale: securing water and food supplies, extending durable connectivity and enabling decarbonization and the energy transition to create a more livable future where people and planet both thrive.

Food & Water Security

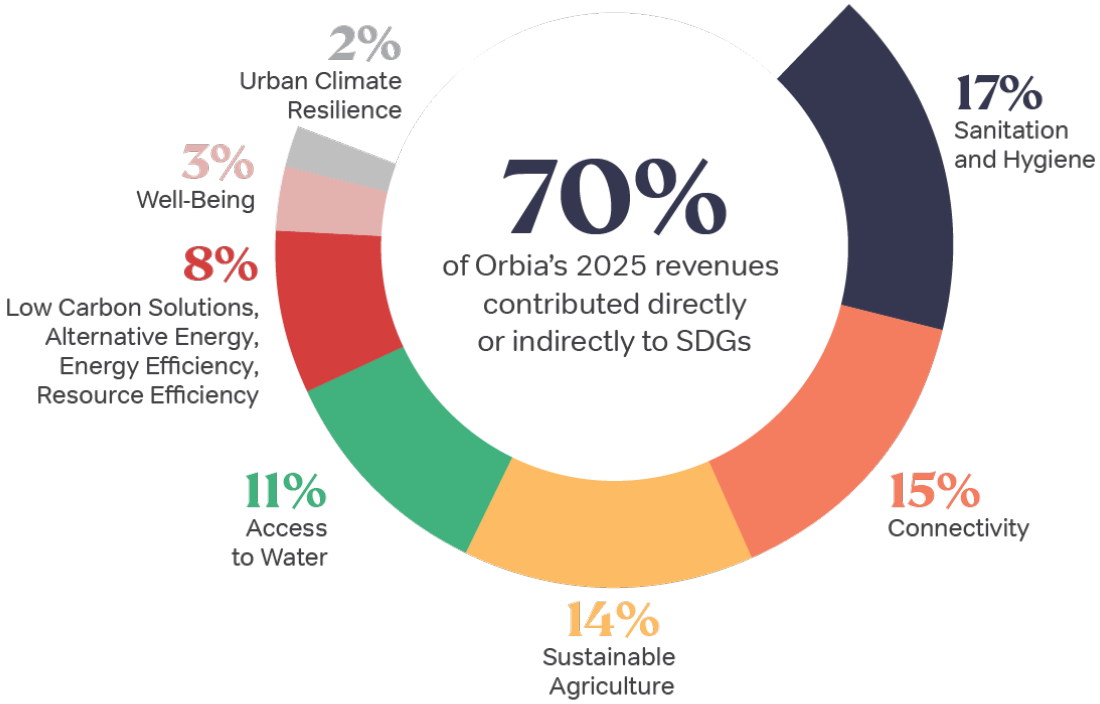

Decarbonization & Energy Transition

Information Access & Connectivity

A Global Leader in Sustainability

Orbia is proud of the recognitions that our efforts and achievements in sustainability have received by external organizations.

S&P Global Sustainability Yearbook member since 2021.

Member of the FTSE4Good Index since 2015.

Joined in 2019, in 2025 achieved a Silver Medal, positioning us among the top 15% of companies assessed.

One of 30 members of the BMV (Mexican Stock Exchange) ESG Index since 2012.

In 2025, Orbia received a C+ Rating from ISS ESG.

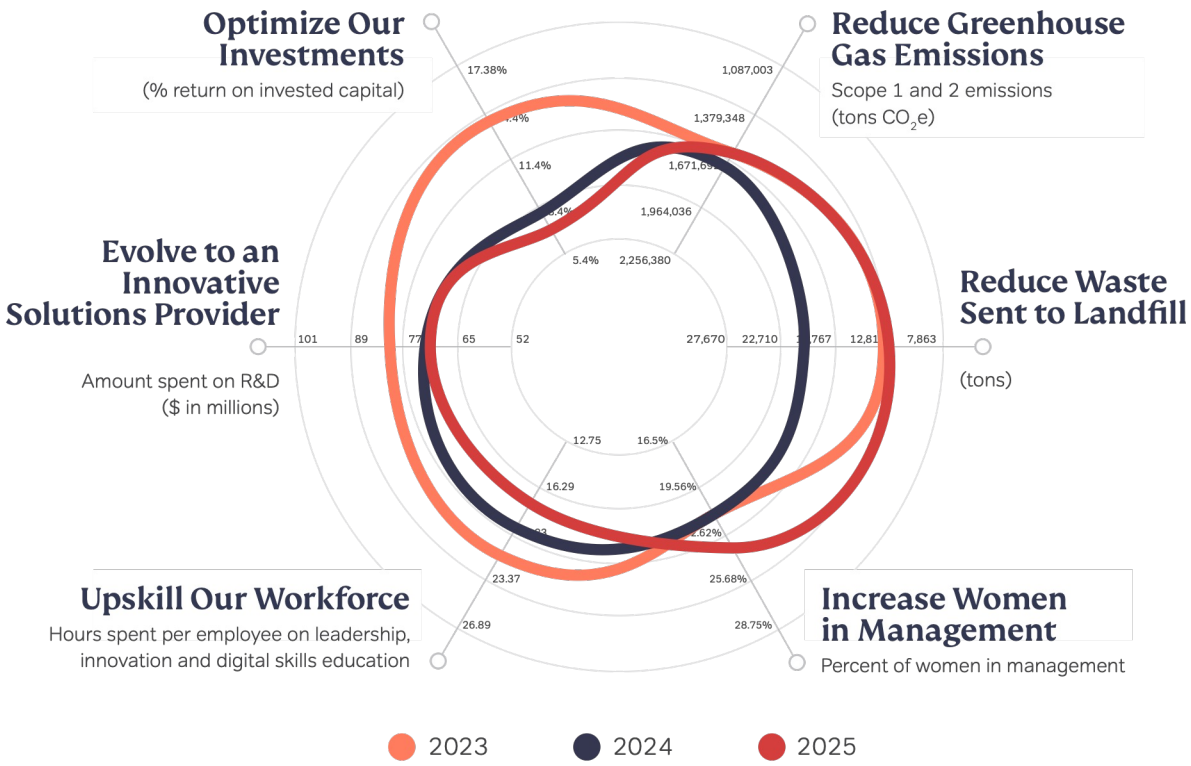

Making a Mark in the World, for the World

Orbia is passionate about tackling the challenges that define how people can live better today and thrive tomorrow.

To inspire momentum on our journey to advance life around the world, our first-of-its-kind ImpactMark transparently demonstrates year-over-year performance on six key environmental, social and governance (ESG) indicators, with the red ring representing the most recent year.

More than a logomark, the ImpactMark is a continuous performance gauge that shows Orbia's progression towards a more perfect circle (and impact as a healthy, innovative and sustainable company). As relevant topics emerge, we will work on evolving the ImpactMark metrics in the future.

2

Our Strategy for Value Creation

Value Proposition

Orbia is built to endure—and to help the world endure. And we are only getting started.

The future we are creating is one where sustainability drives enduring value: one where safe water and sanitation are universal, nutritious food is abundant, connectivity reaches every community and efficient technologies replace carbon-intensive systems.

For our customers, this means greater reliability and competitive advantage. For our investors, it means durable returns. For society, it means lasting progress and resilience.

Leading Positions Across All Business Groups

orbia

Polymer Solutions

#1 Global specialty PVC producer[1]

TOP 10 Global general PVC producer[1]

vestolit alphagary

Advantaged player in PVC and specialty PVC, serving infrastructure, health and well-being and other industries.

Water & Climate Solutions

#1 in Europe[1]

#1 in Latin America

wavin

Leading global provider of innovative water management solutions for resilient construction.

Fluor & Energy Materials

#1 Global fluorspar producer[2]

orbia Fluor & Energy Materials

Largest global fluorspar provider for fluorine-based products with applications from medicine to refrigeration to energy storage.

Precision Agriculture

#1 Globally[1]

NETAFIM™

Global market leader in precision irrigation and sustainable solutions that enable the world's farmers to grow more with less.

Connectivity Solutions

#1 Globally[3]

dura-line

Market leader in data network solutions, including conduit and accessories designed to bring connectivity to all.

1. Company estimates. 2. Per third party reports and company estimates excluding China. 3. Dun & Bradstreet interview with Data Communications sales teams & experts (Mar 2022).

We Focus on Higher Growth Markets, Regions and Prospects From Long-Term Megatrends

Polymer Solutions

30.8%[1]

- Among the most cost-efficient players in the PVC industry with leading market share in specialty resins.
- Recognized for strong technical, commercial and product support.
- Vertically integrated into downstream businesses, particularly with Orbia Water & Climate Solutions.

Water & Climate Solutions

31.3%

- Global brand with strong positions in Europe and LATAM; significant growth opportunities in North America and Asia.
- Providing solutions to optimize water supply, improve sanitation, enhance urban climate resilience and reduce energy use in buildings.

Fluor & Energy Materials

12.2%

- World's largest fluorspar producer outside China, with a strong U.S. manufacturing presence. Vertically integrated into high value applications with a secure "mine to market" approach.
- Investing in low-carbon footprint refrigerants and medical propellants to massively reduce greenhouse gas emissions.
- Enabling a transition to sustainable energy with battery materials.

Precision Agriculture

14%

- Global market leader offering innovative solutions and products that empower farmers to grow more with less.
- Significant growth opportunities in extensive crops, digital farming and turnkey projects.

Connectivity Solutions

11.7%

- Established leader in U.S. with significant market share in Europe and a growing presence in Asia.
- Significant opportunities around microtechnology.

1. Represents percentage of Orbia revenues of 2025

Market Shaper in Sustainable Materials and Solutions

We create resilience by embedding sustainability across sourcing, operations, development and solutions.

Upstream, we build resilience through low-impact and efficient operations, resilient sourcing and circular material flows that reduce cost, volatility and risk.

Downstream, we strengthen competitiveness through sustainable, high-performing solutions and circular models that create customer value, improve compliance outcomes and extend material life.

1. Chlor-alkali is produced by Orbia and sold to third parties in the Americas, in Europe it is integrated directly into the production process (in the Americas, it is also sourced from a third party to enable the process). 2. Vinyl chloride monomer is manufactured by Orbia in Europe, while in the Americas it is sourced from an external supplier. 3. In Europe, ethylene is derived from naphtha sourced from a third party, while in the Americas it is produced directly by Orbia. 4. Upstream solutions include specialty chemicals and differentiated materials. 5. Downstream solutions displayed include main manufactured products. 6. IHS Markit (PVC – Capacity to produce by Process). 7. IHS Markit (PVC – Capacity to produce by Shareholder) 8. Company estimates 9. Dun & Bradstreet interview with Data Communications sales teams & experts (Mar 2022). 10. S&P Global Fluorspar and Inorganic Fluorine Products report 2024.

3 Our Business Groups

Our Business Groups

orbia | Polymer Solutions

01 Leading market position in polyvinyl chloride (PVC) resins and polymer compounds with state-of-the-art operational platform.

02 Cost-efficient position driven by vertical integration and access to favorable economics with an advantageous geographic footprint in attractive end markets.

03 Best-in-class specialty product portfolio with downstream access to high-value applications through specialty resins and compounds businesses.

04 Well-positioned to capitalize on market dynamics through expansive product offerings, deep expertise, capacity expansions and bolt-on opportunities.

orbia | Polymer Solutions

vestolit alphagary

Leading production of PVC resins, polymer compounds, plasticizers, stabilizers and derivative chemicals that advance life around the world.

Solutions have applications from pipes and cables to household appliances and medical devices.

orbia | Polymer Solutions

vestolit alphagary

Addressing customer needs and global challenges.

Creating exceptional value:

- PVC is a cost-efficient and durable polymer, ideal for long-life applications.
- PVC offers many difficult-to-replace properties for critical uses, especially in medical applications.
- Heritage in PVC compounding has widened to include many other polymers (PO, TPE, TPU, CPE, EVA), offering customers a diverse and distinctive portfolio.
- Additives (plasticizers and stabilizers) enhance performance characteristics, enabling PVC to meet a wide range of requirements.
- Derivatives are essential for various industries such as water treatment, cleaning agents and food preservation.

A culture of continual innovation:

- Materials address critical end uses from clean water to transport to healthcare.
- Vertical integration secures supply and provides a platform for innovative development.
- Sustainability targets are realized through collaboration and supply chain innovation.
- Solutions support evolving regulatory requirements in applications like data centers including halogen-free compounds.

Population Growth

9.7B

people are expected to live on Earth by 2050—18% more than today[1]

Urbanization

68%

of the world population will be living in urban areas by 2050, compared to 56% today[2]

Life Expectancy

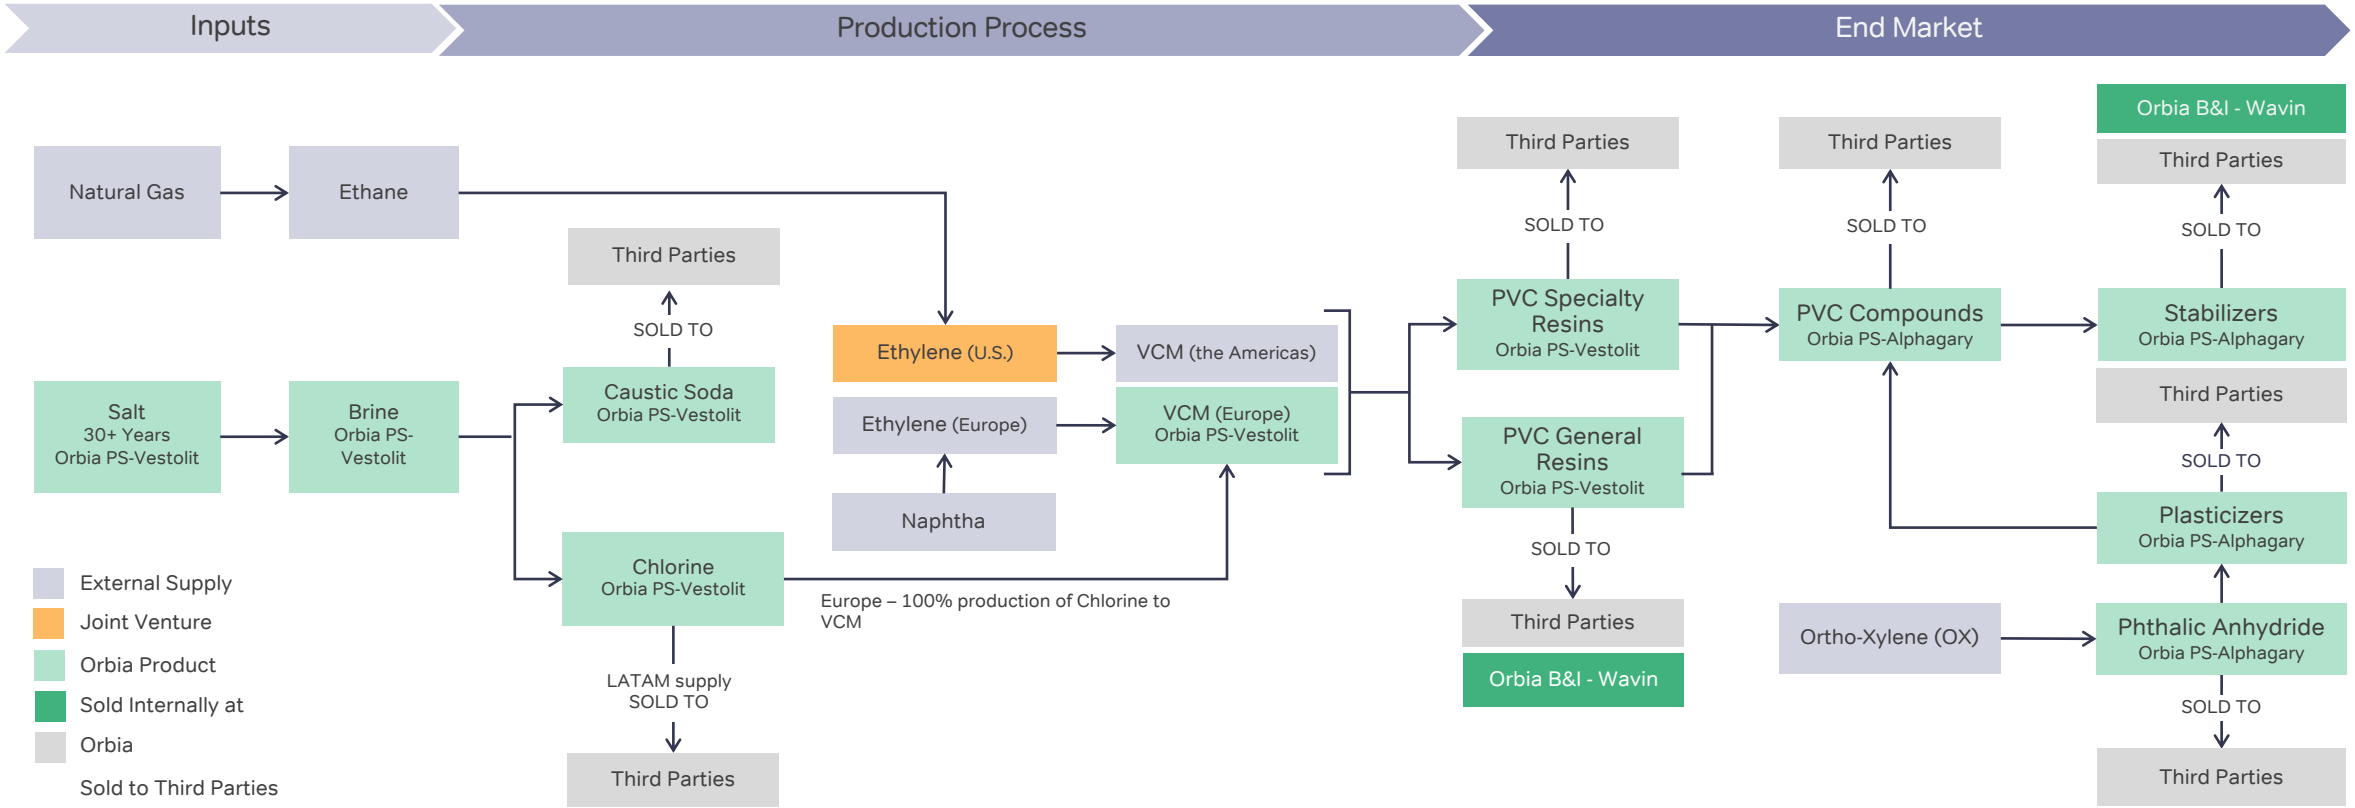

77

by 2050, compared to 73 years today[1]

orbia | Water & Climate Solutions

Addressing customer needs and global challenges.

Future-proofing communities though holistic water management:

- Creating a safe and efficient water supply that reduces disease and health risks.
- Designing more efficient, sustainable and comfortable buildings.
- Protecting cities from floods, drought, biodiversity loss and heat stress.
- Creating sanitation and sewer solutions to support growing populations.

Water Loss

24%

of Europe's water is lost due to leakages[1]

Sanitation

40%

of people worldwide lack access to basic sanitation[2]

Urbanization

33%

of energy is consumed by buildings[3]

3. International Energy Agency, The Breakthrough Agenda Report 2024.

orbia | Water & Climate Solutions

wavin

We advance life around the world by building healthy, sustainable environments.

Safe and efficient water supply

- Water distribution solutions: Delivering high-quality utility distribution networks.
- Hot and cold water solutions: Ensuring reliable day-to-day water supply in buildings.

Better sanitation and hygiene

- Soil and waste solutions: Providing cost-efficient, reliable and easy to install systems for the discharge of in-house wastewater.
- Foul water solutions: Offering pipe systems, manholes and inspection chambers to secure leakage-free transport of wastewater.

Urban climate resilience

- Solutions for stormwater management and climate events, with a complete portfolio to catch, transport, filter, infiltrate, attenuate and reuse rainwater.

Improved building performance

- Indoor climate solutions that enhance comfort while minimizing environmental impact.
- Solution provider for energy efficient heating, cooling and ventilation.
- Fully-integrated solution via one central control platform across applications.

Our Business Groups

orbia | Fluor & Energy Materials

Fluor & Energy Materials

01 One of the world's largest fluorspar producers[1] vertically integrated into high value, high growth applications with a secure "mine to market" approach.

02 Collective owner mindset in optimizing and investing in current portfolio.

03 Investing in low carbon footprint refrigerant gases and medical propellants to massively reduce greenhouse gas emissions for our customers.

04 Enabling the world's rapid transition to sustainable solutions with energy materials.

1. S&P Global Fluorspar and Inorganic Fluorine Products report 2024.

orbia | Fluor & Energy Materials

Creating fluorine-based products, technologies and applications that advance life around the world.

Orbia Fluor & Energy Materials (F&EM) is the trusted global leader in developing, manufacturing and supplying high performance fluoroproducts that are essential to modern life—enabling safer, more efficient technologies today, while decisively advancing the transition to a more sustainable, circular economy.

- **#1** Fluorspar producer[2]
- **#1** Medical propellants

orbia | Fluor & Energy Materials

Addressing customer needs and world challenges.

Fluorine enhances everyday lives:

- Energy-efficient cement and steel production
- Cooling and refrigeration
- Pharmaceuticals
- Energy materials
- Coating for telecom cables
- Displays and chips for consumer electronics such as phones
- Solar panel protection

Leading decarbonization innovation:

- Transition minerals into engineered raw materials for a circular economy.
- Low-GWP refrigerant gases and medical propellants.
- Localized, vertically integrated and secure supply chain for lithium-ion batteries with strong U.S. manufacturing presence.
- Technology development for battery recycling and custom electrolytes to improve battery performance.

Decarbonization

20.4%

rate the world must reach each year until 2050 to limit global warming to 1.5°C[1]

Efficiency

orbia | Fluor & Energy Materials

Mine to market integration for today and tomorrow.

Our Business Groups

orbia | Precision Agriculture

01 A global leader in precision agriculture and the largest irrigation company in the world, empowering millions of farmers around the world to be more resilient and confident—supporting a more food-secure future for generations to come.

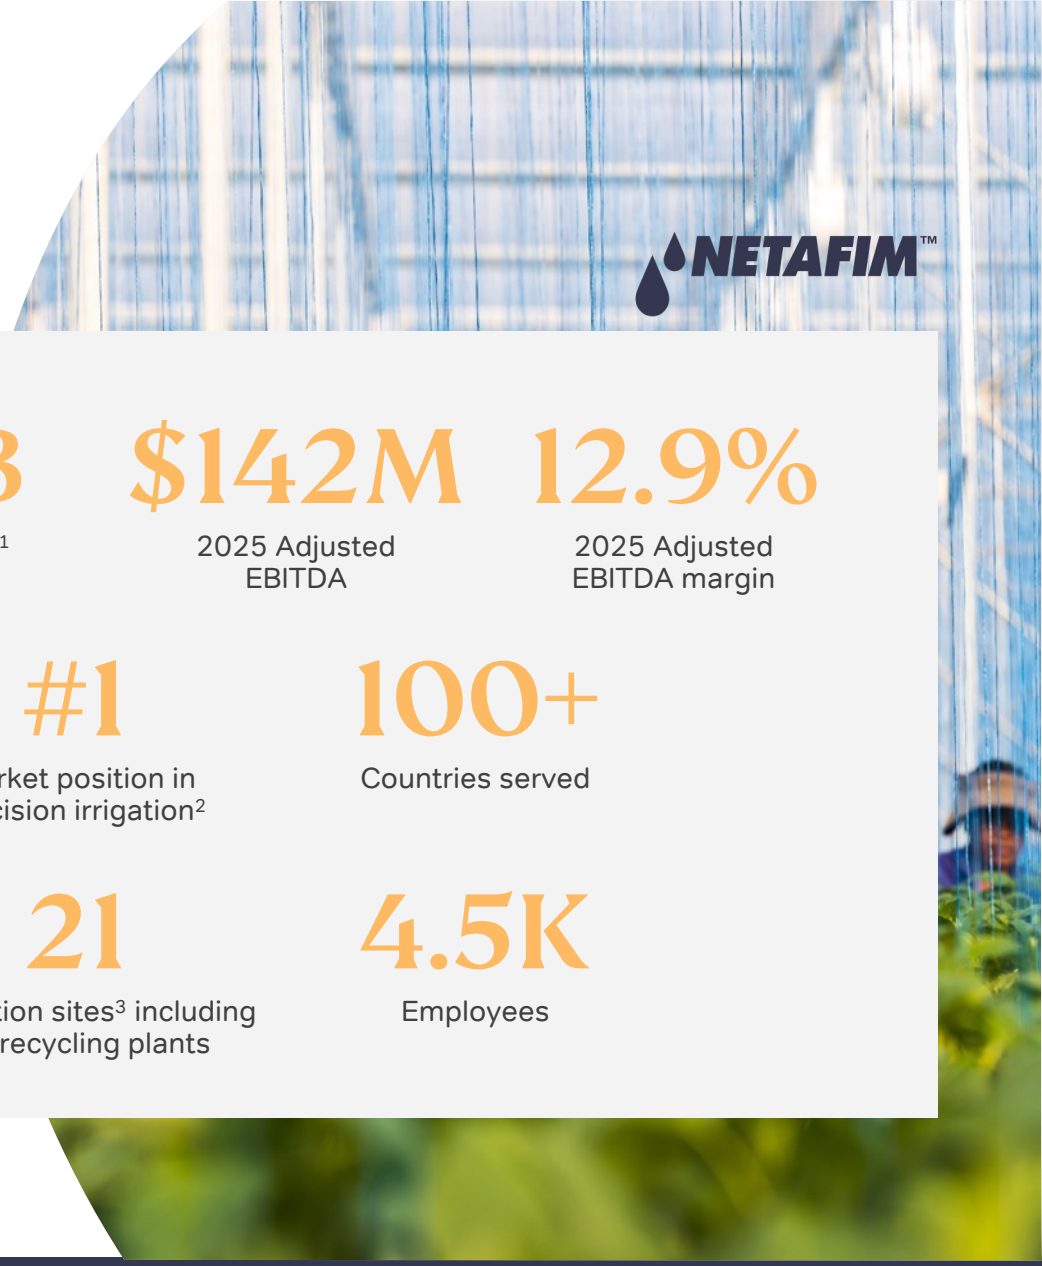

02 Driving market growth practical, innovative solutions across high-value and large-scale crops, combining digital farming tools and end-to-end projects that enable farmers to grow more with less.

03 Continuous innovation and development of new solutions and products that give farmers greater accuracy, control and consistency—translating agronomic expertise and data into confident day-to-day decisions.

04 With a global presence in over 100 countries and 25 subsidiaries across five continents, we combine global expertise with local knowledge—supporting farmers across crops, soils and conditions; any climate, anywhere.

orbia | Precision Agriculture

Helping farmers grow more with less, feeding the world sustainably.

Precision Agriculture partners with farmers to produce more with fewer resources, through precision irrigation and agriculture solutions that improve yields while using water and inputs more efficiently.

- A global leader with a comprehensive range of solutions, tools, products and services that make precision agriculture practical and scalable—helping farmers turn knowledge, data and experience into confident decisions in the field.
- Committed to working alongside farmers to drive adoption of sustainable agriculture; advancing regenerative practices, circularity and recycling programs, and water and carbon projects—while continuously measuring and reducing environmental impact.

orbia | Precision Agriculture

Addressing farmer needs and global agricultural challenges.

Supporting farmers to overcome key agricultural challenges with integrated solutions:

- Advanced irrigation and fertigation products and solutions.
- Digital farming
- Agriculture projects
- Controlled environment agriculture—greenhouse turnkey projects

Precision agriculture enables farmers to grow more with less:

- Increases crop yields
- Improves crop quality
- Decreases water usage
- Reduces carbon footprint
- Minimizes fertilizer usage
- Lowers energy usage

Water Use

70%

of the world's freshwater use is from agriculture[1]

Urbanization

60%

more food will need to be grown by 2050 to meet the needs of the planet's population[1]

Water Waste

324

billion cubic meters of freshwater are lost each year due to drought and unsustainable practices[2]

2. Continental Drying: A Threat to Our Common Future 2024.

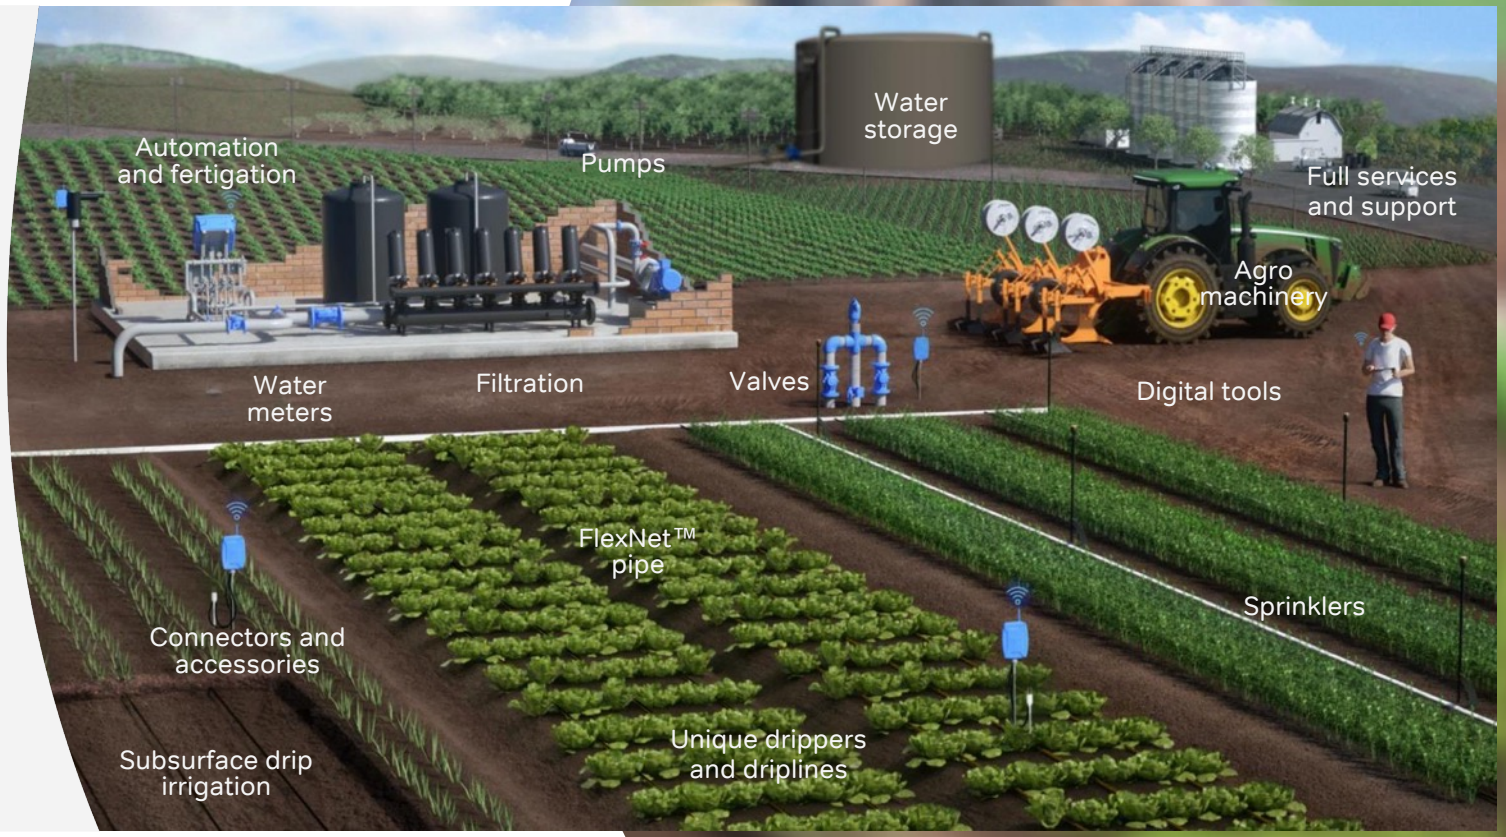

orbia | Precision Agriculture

NETAFIM™

End-to-end precision agriculture solutions that help farmers grow with confidence.

Providing a broad portfolio of end-to-end integrated precision agriculture solutions that span from water source to root zone.

Gives farmers the control and insights they need to make precise, confident decisions about crop health, soil conditions and yield performance.

Our Business Groups

orbia | Connectivity Solutions

01 A global leader in the design and manufacturing of fiber conduit as well as customized connectivity solutions with scale and reach.

02 Strategic partner for the world's largest telecom and data center companies in fiber network development to drive significant, long-term growth.

03 Well-positioned to capture upsurge in demand in fiber network development.

04 Future growth driven by increasing sales coverage and manufacturing footprint, expanding into new markets and adding higher-value products and services.

orbia | Connectivity Solutions

dura-line

Connecting cities, homes and people to advance life around the world.

Producing high-density polyethylene (HDPE) conduit, accessories and other connectivity solutions for the telecommunications, transportation and electrical markets.

- Enabling advanced connectivity infrastructure.
