

FOR IMMEDIATE RELEASE

## Orbia's Building and Infrastructure Business Wavin Transitions to Environmental Product Declarations (EPD) for Product Portfolio

**Amsterdam, November 29, 2022** – Orbia's Building and Infrastructure Business Wavin is transitioning to Environmental Product Declarations (EPDs) for its products in the European market. Based on third-party verified Life Cycle Assessments (LCAs), EPDs transparently map production processes to resource impacts. Offering details as to environmental impacts across the entire life cycle, EPDs enable building designers, planners, contractors and developers to choose more sustainable products and solutions.

"Providing detailed environmental information for each Wavin product marks an important milestone in realizing a sustainable value chain for the European construction industry," said Anneleen Veldhuizen, Sustainability Manager at Wavin EMEA. "The LCAs and EPDs offer our customers transparency and insight into the environmental impact of their construction projects. With these EPDs, we have supported various customers in selecting the best products for their projects that also have the lowest footprints."

As a global business, Wavin aims to make a difference and become a worldwide leader in sustainability. By monitoring, measuring and communicating emissions and process impacts for its products based on LCAs and EPD disclosures, Wavin can initiate continuous product improvements and production measures that contribute to lower greenhouse gas emissions.

Continued Veldhuizen, “Our sustainability journey is well underway. Having more insight into the true impacts of our products globally helps us evaluate and optimize our production chain. So our production becomes more sustainable and our suppliers and customers get cleaner, greener, high-performance products and solutions.”

The EPDs that are currently available cover the majority of Wavin’s product portfolio in Europe. The remaining products are expected to receive EPD status by the end of the year.

## About Orbia

Orbia is a company driven by a shared purpose: to advance life around the world. Orbia operates in the Polymer Solutions (Vestolit and Alphagary), Building and Infrastructure (Wavin), Precision Agriculture (Netafim), Connectivity Solutions (Dura-Line) and Fluorinated Solutions (Koura) sectors. The five Orbia business groups have a collective focus on expanding access to health and wellness, reinventing the future of cities and homes, ensuring food and water security, connecting communities to information and accelerating a circular economy with basic and advanced materials, specialty products and innovative solutions. Orbia has a global team of over 23,000 employees, commercial activities in more than 110 countries and operations in over 50, with global headquarters in Boston, Mexico City, Amsterdam and Tel Aviv. The company generated \$8.8 billion in revenue in 2021. To learn more, visit: [orbia.com](https://orbia.com).

## About Wavin

Orbia’s Building and Infrastructure business Wavin is an innovative solutions provider for the global building and infrastructure industry. Backed by more than 60 years of product development experience, Wavin is advancing life around the world by building healthy, sustainable environments for global citizens. Whether it’s to improve the distribution of clean drinking water, make sanitation accessible for everyone, create climate resilient cities or to design comfortable living spaces, Wavin collaborates with municipal leaders, engineers, contractors and installers to help future-proof communities, buildings and homes. Wavin has 12,000+ employees across approximately 65 production sites worldwide, serving over 80 countries through a global sales and distribution network.
